EDUCATION

Sep. 2026 - Present
BSc - Computer Science (Intended)
University of British Columbia, Vancouver BC
- Relevant Coursework: CPSC 110, CPSC 121, CPSC 210

Aug. 2022 - June 2026
High School Diploma
'Iolani School, Honolulu HI
- Relevant Coursework: Honors Machine Learning, Bioinformatics, APCSP, Robotics 1-3

EXPERIENCES

June 2026 - Present
Solo App Developer
CedarNotes, Vancouver BC
- Constructed & managed the Claude development pipeline
- Set up and maintained the backend servers
- Coordinated beta testing sessions and organized user feedback

June 2025 - September 2025
Solo Game Developer
Momentum is Conserved, Honolulu HI
- Designed & built levels in Unity, and programmed game mechanics in C#
- Edited trailers in Davinci Resolve and coordinated beta testing
- Saw the game through the Steam Revision process and got it published on Steam

TECHNICAL PROJECTS

Personal Website - Independent Project
- Drafted 3D scene, then used Blender MCP with Claude to refine and Three.js to render on web
- Made the "About Me" page in Figma and used Figma MCP with Claude to import to website.

Oboxle - StormHacks 2026 Project
- Browser game in which your camera tracks your frame, translates your movements into boxing moves, and lets you box your friends
- Worked on the avatar scanner, homescreen UI, and making 3D assets in Blender
- Made demo video and presentation

Findr - HelloHacks 2026 Project
- Website that scrapes Instagram for UBC club events and lists upcoming events in a calendar as well as assigns tags to each event
- Made the webscraper, the demo video, and the presentation

QR Code CLI - Independent Project
- CLI written in Python for converting text to QR codes
- Used pip for packaging and git for version control

Microwave AI - Course Project
- Headed a team of 3 to develop a webapp for predicting microwave cook times based on images of food
- Used TensorFlow in Python to create the prediction model
- Organized development milestones for the team and presentations

Kiru (Game) - Independent Project
- Roguelike that translates mouse paths & strokes into attacks
- Created environments, modeled characters, and made animationsin Blender
- Coded a stroke recognition model & webapp with TensorFlow and React respectively (linked)
